Film*** (Reusable 3-5 mm thick)	WIP		
Cuvettes	1 x 1 x 3 cm	100	\$375

\* Custom Shapes are also available - contact Heuris - add +15% for brachytherapy channels

\*\* Nominal dimensions – PRESAGE® dosimeter dimensions may vary

Specifications

\*\*\* Thickness above 0.9 mm generally referred to as sheets

- Peak optical absorption at 633 nm. Information about refractive index matching liquids is available on request.
- PRESAGE® dosimeters are sensitive to ultraviolet light. For accurate results please limit the exposure to sunlight and other UV sources by returning dosimeters to the opaque plastic packaging when not in use.
- **Upon receipt store the dosimeters in a refrigerator (2-8 C). Prior to use allow the dosimeter to warm to room temperature (for 1 Kg ca 3 hrs. & Film 10 min)**
- PRESAGE® is made of solid, non-toxic, polyurethane. It can be recycled or sent to landfill.
- If polyurethane recycling is not available in your area, please enquire about return shipping and we will have it recycled.

**Terms:**

Full payment required prior to shipment (delivery charges not included). All

taxes and duties are extra if applicable.

Delivery approximately 30 days, to be confirmed when order is placed.

**Three month limited warranty**
